

Single-Patient Drills

Fresh and sharp.
Optimal site preparation every time.

zimmer | dental
Confidence in your hands™

Single-patient drills reduce disease transmission and eliminate post-surgery sterilization.

Now every implant patient can have the benefits of brand new drills. Each drill is sharp and sterile, providing optimal site preparation while reducing the risk of disease transmission. When the implant procedure is complete, the drills are discarded — eliminating the labor and cost of cleaning and re-sterilization.

- New, sharp drill for every patient — can be used for up to 10 implants per surgery.
- Patient-specific drills eliminate cross contamination.
- No cleaning or sterilization after surgery saves the practice time and money.

Common kit (short)

Single Patient Drills for AdVent® and Tapered Screw-Vent® Implants

Description	Contents	Part No.
Drill Kit, Single Patient, Long 3.7mm Implant, 17mmL	3.0mm Round Bur 2.3mm Pilot Drill 3.4/2.8mm Stepped Drill	DSTK3
